NOW REQUIRED:

YOU MUST TURN IN A **COPY**
OF THE **PROPERTY DEED**
WITH YOUR
ZONING APPLICATION.

PROCEDURE FOR OBTAINING A ZONING/SIGN PERMIT

To All Applicants:

In order to obtain a Zoning and/or sign permit, a sketch plan of your property must be attached. The plan **MUST** include the following or it may be returned as incomplete.

1. Overall plan of property. This does not need to show bearings but should show distances to the best of the Applicants ability.
2. Show locations of all wells, septic tanks, drainfields, existing building, proposed building, swimming pools, permanent landmarks such as large trees, driveways, electric lines, and property lines.
3. Please be sure to show intersecting street names.
4. Show all distances to all property lines from the proposed structure.
5. For signs, please show where the sign will be located, dimensions, what the sign will read, height, if it will be illuminated, and is it temporary or permanent.
6. Please note that if you are replacing a structure, you must show what the previous structures size and dimensions were and what the proposed structures size and dimensions are. Please state the use of the proposed structure.
7. The plan must show the disturbed area including driveway grading, homesite grading, including, but not limited to septic systems and wells. This is all part of a new regulation set forth by the PA DEP effective November 19, 2010.

Below is a sample plan that can be followed. You do not need to have this done by a professional as long as it is legible. We understand that plans may not be to exact scale, however they must show the distances. Please note that this will help speed up the process of your permit application. If the plan does not have all the required information, your plan may be denied.
